PERSONAL PROFILE

I am a 13-year-old developer focused on Linux systems, networking, and modern full-stack web development. I am a self-driven learner who enjoys solving complex technical problems, managing virtualized environments, and building high-performance web applications using the latest JavaScript frameworks.

TECHNICAL SKILLS

- Frontend:** React, Next.js, Vite, HTML5, CSS3, JavaScript (ES6+).
- Operating Systems:** Linux (Advanced Terminal/CLI, Ubuntu, Debian, CentOS, Arch).
- Virtualization:** Proxmox VE (Managing Virtual Machines and Containers).
- Networking & DevOps:** SSH, DNS Management, Port Forwarding, Git/GitHub, Bash Scripting.
- Development Tools:** NPM/Yarn, Vercel deployment, Linux server optimization.

TECHNICAL EXPERIENCE

Modern Web Development (React & Next.js)

2023 – Present

- Developed fast, SEO-friendly web applications using **Next.js** and **Vite** for optimized build times.
- Implemented component-based architectures in **React** to create reusable UI elements.
- Managed state and client-side routing to provide a seamless "Single Page Application" (SPA) experience.

Linux Systems & Virtualization

2023 – Present

- Successfully installed and configured 50+ Linux environments to test various distributions and server configurations.
- Utilize Proxmox to manage multiple virtual machines (VMs), allowing for rapid testing and deployment of web services.
- Experience in managing headless (CLI-only) systems, focusing on security and resource efficiency.

EDUCATION & LEARNING

Independent Technical Study

100% self-taught through hands-on experimentation, technical documentation (Man pages, React Docs, Next.js Documentation), and community resources. Focus areas include modern frontend frameworks and system administration.

KEY ACHIEVEMENTS

- Successfully transitioned from basic web design to building complex applications with React and Next.js.
- Maintained a consistent learning schedule while staying up to date with modern web standards and Linux security practices.
